To whom it may concern:

It is my pleasure to endorse Southeast Secure Shredding. As a busy medical practice we have high concerns for the proper care, storing and shredding of very confidential information for our patients. We have had occasion to have Southeast Secure Shredding pick up records from our office. Their staff was very professional and took the utmost care to protect the privacy of the records. We have also had occasion to visit their facility and have been impressed by the protective procedures they have in place to provide security of the records while in processing for destruction.

Sincerely,

Andre Vendryfs, M.D., PA
